              Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        DB

These epitopes were obtained at different stages of the life cycle of P. falciparum. CDC/NIIMALVAC-1 vaccine has antiparasitic activity and can used for treatment and prevention of malarial infections. Anti-CDC/NIIMALVAC-1 antibodies can be used for detecting
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Novel recombinant protein as vaccine for treating malarial infection comprises antigenic peptides obtained from different stages of plasmodium falciparum life cycle \,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             The present sequence is the antigenic epitope P594, derived from circumsporozoite protein (CSP) of the sporozoite stage of Plasmodium falciparum. It is used in the construction of recombinant protein CDC/NIIMALYAC-1, which is a multivalent, multistage malarial vaccine.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               AAR13175 standard;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence

The DNA encoding the 1st 81 AAs of the N-terminal of NS1 (NS1_81) is linked via a synthetic sequence to DNA encoding Region I contg. flanking regionless the 18 AA signal region, which in turn is fused to DNA encoding Region II-contg. flanking regionless the 18 AA signal region is designated RLIGelta9. The Pro residue separating the Asp (at the C-terminal for the linker) from RLIGelta9 is an artifact of a filled in BamHI in the Asp (at the C-terminal Asis This CS (as in State of the linker) from RLIGelta9 is an artifact of a filled in BamHI
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         polypeptide comprising immunogenic determinants from P - for vaccine against malaria infection in humans.

The DNA encoding the 1st 81 AAs of the N-terminal of NSI (NSI_81) is linked via a synthetic sequence to DNA encoding Region I contg. flanking regionless the 18 AA signal region, which in the contg. flanking regionless the 18 As signal region, which in the contg. flanking regionless the 18 As signal region, which in the contg. flanking region II-contg. flanking region for the Asp (at the C-terminal of the linker) from RLfAuth is an article fact of a filled in BamHI site; the Gly separating Region I and C Region II-contg. CS flanking regions is an artifact of a synthetic PokI/TthIII I linker. The peptide can be used in a vaccine for the contraction against malaria.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Gross MS,
